About the Accolade Education Program

This module is part of the Sopheon Accolade Education Program (AEP). The AEP modules are designed to help Accolade users perform the tasks in their company's business process using the Accolade application. The content in the modules is meant to be used side-by-side with the application, and is part of the overall documentation suite provided for Accolade.

The benefits of using Accolade as part of your company's innovation development process include the following:

- Reduced cycle time by displaying clear structure and visibility.
- Reduced rework through timely, properly sequenced completion of all key tasks and milestones.
- Assured positive user experience through properly developed product requirements.
- Improved communication by automating collaboration between multifunctional team members.
- Provided decision-making information. Poor projects are stopped or placed on hold so resources can be redirected to more promising and higher value projects and products.
- Provided clear project requirements. Expectations of a project team and project manager at each stage are clearly spelled out.
- Managed business risk. Break resource commitments into increments or stages.
- Established key baseline information and metrics.

The Accolade documentation suite contains the following additional components:

Document	Contents
<i>Sopheon Accolade What's New in This Release</i>	For each release, review this document for an overview of the new features and changes within the release.
Accolade Online Help	Accessible directly through Accolade, the online Help provides comprehensive how-to and reference information about all aspects of using Accolade.
<i>Sopheon Accolade Administrator's Guide</i>	Provides information for administrative professionals regarding Accolade setup. This information is also provided in the online Help.
<i>Sopheon Accolade Installation Guide</i>	Provides information about the installation of the application and its required databases.
<i>Dashboards for Accolade Installation Guide</i>	Provides installation information for installing the Dashboards for Accolade component.
Quick Reference Cards	A PDF that can be printed double-sided that provides quick tips and navigation information for using Accolade.

Document	Contents
Online Help for Accolade Add-ins	Accolade add-ins, including Accolade Office Extensions, Accolade SmartDocuments for Google, Accolade SmartDocuments for Office, Accolade Portfolio Optimizer, and Accolade's integration with Microsoft Project, each include their own Sopheon created Help file accessible directly from the application after the add-in is installed. Each Help file describes how to use the features of that particular add-in.

Prerequisites for Using this Module

The contents of this training module assumes you are assigned the Accolade user roles and have a basic understanding of the terms and concepts listed below and how they are used in your installation. In addition, the content in the related training modules listed below may be helpful before reviewing the contents of this module.

Accolade User Roles

- Administrator
- Process Design*
- Idea Manager
- Project Managers
- Project Team Member

*For configuration and setup.

Terms and Concepts

- General Accolade terminology and concepts
- Projects

Available Pod Types

Page layouts can contain one or more pods to display information. Each pod can contain a single element, such as one metric, one global link, or one image. Review the following information about the types of pods available and their potential uses.

Pod Type	Notes
Advanced Platform	<p>Adds a pod to save JavaScript and HTML files to execute functions and features in a layout at a global or project level.</p> <p>The editor options will not display until the pod is added to the layout and the layout is saved.</p> <p>To add or write a JavaScript file or HTML file select from the following options:</p> <ul style="list-style-type: none"> • To add an existing file - Click  to open the editor dialog and click  to upload the desired HTML or JavaScript file. Click Open to add the file.

Pod Type	Notes
	<ul style="list-style-type: none"> • To edit an existing file or create a new file - Click  to open the JavaScript editor, write or update the code for the file directly in the editor, and click Save or Save and Close. <p> Click  in the editor to launch the WebAPI help.</p> <p>Click  to delete the JavaScript file or HTML file. Selecting a different pod type will remove JavaScript and HTML files. Download and save the files before making changes to the pod.</p>
Buttons	<p>Adds a button to a layout, such as a button within a portfolio that can be clicked to directly create a new project or project links.</p> <p>Enter the name of the button in the Button Text field when creating the pod.</p> <p>Select from the following options:</p> <ul style="list-style-type: none"> • Add New - Creates a button that, when added to a global or project page layout, can be clicked to create projects and/or project links directly from the page. Click  when defining the pod to select a process model and process links as necessary. Note that project links cannot be created for pods used on a global layout. <p> Example</p> <div data-bbox="563 1064 1261 1434">  <div data-bbox="563 1360 1261 1434"> <div>Add New Feature</div> </div> </div> <p> Multiple Add New pods can be used on a layout, each with different combinations of process models and link types.</p> <ul style="list-style-type: none"> • Create Child Project - Creates a button that, when added to a project page layout, can be clicked to create a new project directly from the page. <p> Example</p>

Pod Type	Notes
	 <p>Note: The Create Child Project button is part of Ideation.</p> <p>💡 The ability to add a new project using the Add New or Create Child Project button on a project page requires Add Project rights for the default access group (if one is assigned) or for the parent project's access group (if there is no default access group specified).</p>
Chart	<p>Adds a pod that contains a chart created using Accolade. Charts are visual representations of the data within a report.</p> <p>In order to add a chart to a pod, the chart must be set as Available to Configuration and the chart access groups must match at least one access group of the layout. Additionally, Process Designers must have "Can Edit" on at least one of the matching access group permissions in order for the chart to be available for them to use in the layout.</p> <p>Viewing a chart's contents within a page layout does not require Reporting Rights; however, a user must be an owner or have at least one matching user role for the chart to display.</p>
Documents	<p>Adds a pod that contains document types pertaining to a single project when the layout is included as a page within a project.</p> <p>The Gate Documents selection includes a pod that contains gate documents that display on a project. Gate owners and those with appropriate editing rights can upload and download versions, download and edit the associated template, and select which version to publish. If a layout containing a gate documents pod is assigned to a specific gate, the associated gate documents display. If the layout containing the gate documents pod displays as a project page, the gate documents specific to the current project gate display.</p> <p> Example</p>

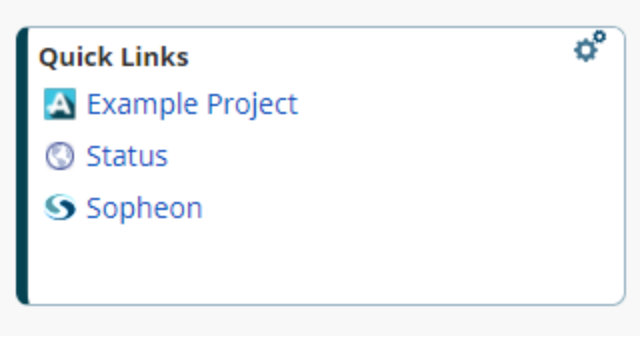

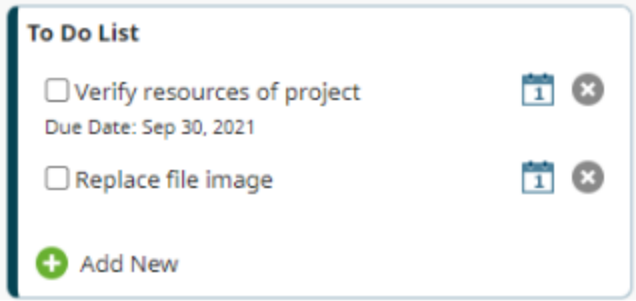

Pod Type	Notes
	<div><div><div><div>Gate Documents</div><div></div><div>Gate Contract</div></div></div></div> <p>Note: These pods are not available for selection if the Create global link option for the layout is selected.</p>
Gates	<p>Adds a pod that contains gate information and capabilities for users on project teams.</p> <p>Note: These pods are not available for selection if the Create global link option for the layout is selected.</p> <p>Select from the following options:</p> <ul style="list-style-type: none">Gate Readiness - Provides a graphic that indicates the health of a project stage, to help determine at a glance how ready the project for an upcoming gate meeting. The pod includes the how many days until the next gate meeting and a status of the assignments with the current stage. Deliverables and activities are grouped together and considered "assignments" in this pod, and any item set to Not Required in the project is not included in the calculations. Deliverables set to In Trouble and Not Started are represented by a red and grey pie slice respectively. <div><div>EXAMPLE</div><div>Example</div></div> <div><div><div><div>Gate Readiness</div><div>Stage 1 - Scoping</div><div>Assignment Status</div></div><div></div><div><div>3 Days until Next Gate</div><div><div><div>11%</div><div>Completed: 1</div></div><div><div>11%</div><div>In Progress: 1</div></div><div><div>0%</div><div>In Trouble: 0</div></div><div><div>78%</div><div>Not Started: 7</div></div></div></div></div></div> <ul style="list-style-type: none">Gatekeepers - Provides a place for various gate-specific information to be displayed. Gate owners can manage and update gatekeeper assignments as necessary from this pod. Additionally, gatekeepers can vote on gate

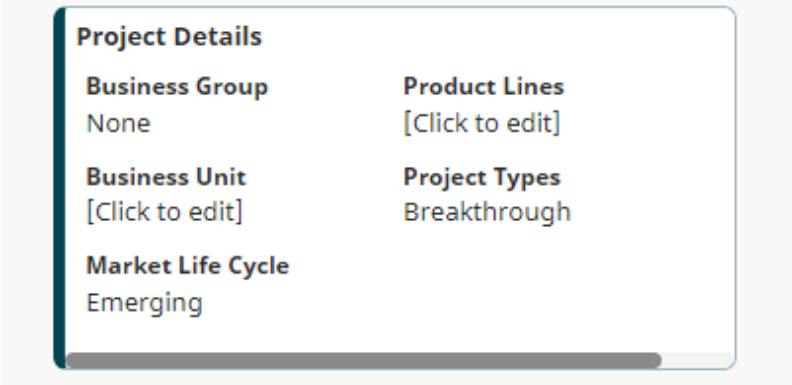

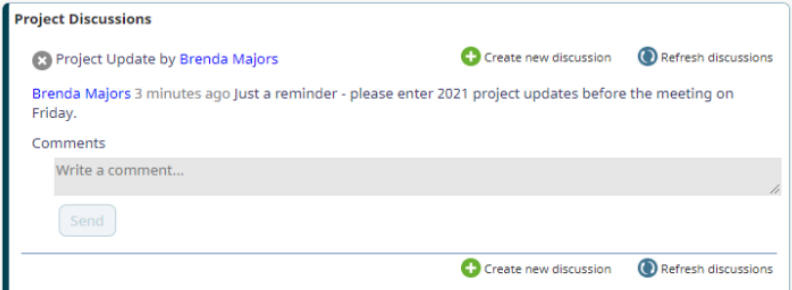

Pod Type	Notes
	<p>decisions if gate voting is enabled, and can add or update comments regarding gate decisions. Gatekeeper votes and comments display as read only for others on the team. If gatekeeper skipping is allowed for the gate, gate owners can skip any gatekeeper vote decision.</p> <p> Example</p> <div data-bbox="454 499 1284 703">  <p>The image shows a pod titled "Gatekeepers". Below the title, it says "Gate Decision" and "Pending Decision". At the bottom, there is a comment bubble with the name "Brenda Majors".</p> </div> <ul style="list-style-type: none"> Meeting Dates - Adds a pod that displays meeting information for a project. Gate names display with the meeting date below it. Users with rights to change gate dates such as Process Manager, Idea Managers, or Project Managers can edit meeting dates directly in the pod. All users on a project can see meeting information centrally located in this pod. Additionally, the gate name takes users to the corresponding gate page when clicked. Click  when defining the pod to set the number of columns the meeting information displays. The pod information wraps from left to right across the pod to populate the columns set. Meeting date calculation settings and restrictions still apply. <p> Example</p> <div data-bbox="643 1218 1099 1661">  <p>The image shows a pod titled "Project Gate Dates". It contains a list of five gates with their corresponding dates:</p> <ul style="list-style-type: none"> Gate 1 - Go to Build Business Case Jan 31, 2021 Gate 2 - Go to Development Feb 26, 2021 Gate 3 - Go to Testing and Validation May 14, 2021 Gate 4 - Go to Launch Jun 25, 2021 Gate 5 - Project Close Oct 08, 2021 </div>
Global Links	Adds a pod that displays the content of a global link, such as an intranet page, a Dashboards for Accolade report, or a planning view from Innovation Planning.

Pod Type	Notes
	<p>Based on your server setup, only defined http, https, and relative file global links are available to add to a pod.</p> <hr/> <p>Important! Accolade respects web browser and web page security features for embedded global links. The linked web page may include certain security settings that prevent the web page from loading within the Accolade application window.</p> <hr/> <p>If you select an Innovation Planning view defined as a global link to display in a pod, and the layout is intended for use within a project page, select the Filter to project option to display the view filtered to the project ID saved as part of the global link configuration.</p> <p>Note: The filter functionality does not apply to composite planning views.</p>
HTML Report	<p>Adds a pod that displays the content of a specified HTML report. Available HTML reports display in the Content field.</p> <p>In order to add an HTML report to a pod, the report access groups must match at least one access group of the layout. Additionally, Process Designers must have "Can Edit" on at least one of the matching access group permissions in order for the report to be available for them to use in the layout.</p> <p>Viewing a report's contents within a page layout does not require Reporting Rights, however, a user must be an owner or have at least one matching user role for the report to display.</p>
Metric	<p>Adds a pod that can contain a single metric and displays the currently assigned metric value.</p> <p>Metrics within pods display as read-only.</p> <p> Example</p> <div data-bbox="597 1356 1143 1486">  </div> <p> To include the metric's name, add the name as the title of the pod.</p> <hr/> <p>Important! Long string metrics with the Rich Text check box enabled cannot be added to pods.</p>
Planning View	<p>Adds a pod that displays a planning view from Innovation Planning in read-only format to any user who does not have the Planner role.</p>

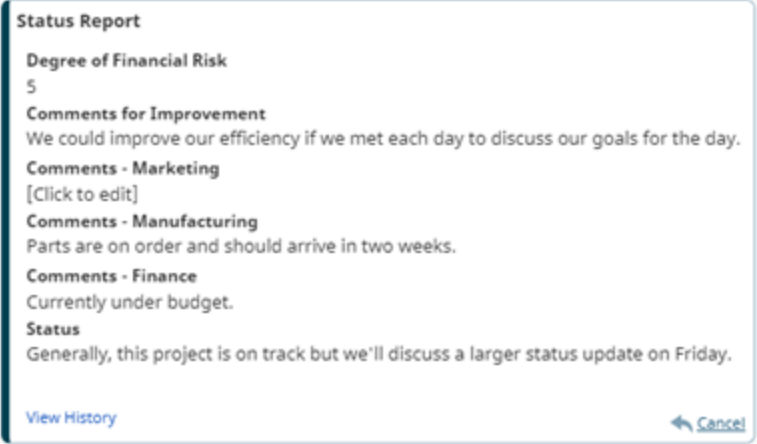

Pod Type	Notes
	<p>Click  when creating the pod to define the planning navigation options that are displayed within the pod.</p> <p>Only planning views made public will display in the content drop-down for the pod. If the layout is intended for use within a project page, check the Filter to project option to display the view filtered to the project ID. The filter functionality does not apply to composite planning views.</p>
Plugin	<p>Adds a pod that displays a configured plugin.</p> <p>Click  when defining the pod to set the properties, attributes, and default settings of the plugin.</p>
Portfolio Optimization	<p>Adds a pod that contains information typically used when creating layouts for portfolio optimization purposes.</p> <p>The Projects Grid selection includes information for all projects in the loaded portfolio that a user has access to, and that are included in a class with the Include in Portfolio Optimizer option selected.</p> <p>Click  when creating the pod to define the default set of data columns that display in the pod.</p>
Productivity	<p>Adds a pod that contains productivity-related elements to assist with managing projects and timelines.</p> <hr/> <p>Important! For pods that are used in the personalized home page layouts, Administrators and Process Designers with the Template Access role can make changes to home page layouts on a global level by clicking  when defining the pod, for example, to add company landing page hyperlinks to the Quick Links pod for all users, or to add additional information at a company level. Changes at an individual level should be made by the user from within their personal view.</p> <hr/> <p>Select from the following options:</p> <ul style="list-style-type: none"> • Calendar - A pod that displays a calendar, allowing users to visually display important dates such as start and end dates for deliverables and activities, deadline dates for workflows, and project gate dates. Double-clicking on an event takes the user directly to the event details or applicable project page. <p> Example</p>

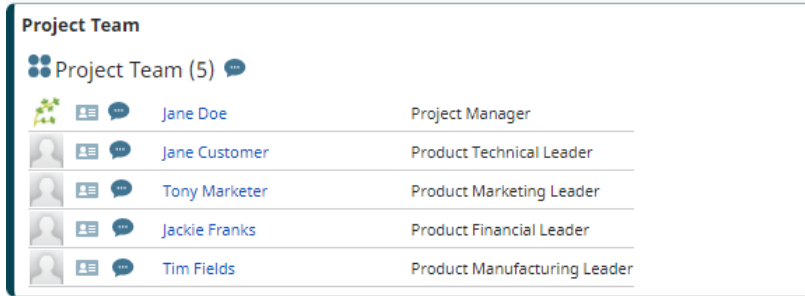

Pod Type	Notes
	<div data-bbox="438 266 1292 896"> </div> <ul style="list-style-type: none"> Countdown - A pod that allows users to display a countdown of days until the occurrence of an important date or event of their choosing. Click  when defining the pod to set the event name and date, and to select an image to display in the pod. <div data-bbox="477 1115 682 1173">  Example </div> <div data-bbox="547 1220 1183 1505"> </div> Quick Links - A pod that allows users to display a list of frequently used links to projects, websites, and other global links defined in Accolade. Click  when defining the pod to select existing Accolade links, or to create customized links. <div data-bbox="477 1745 682 1803">  Example </div>

Pod Type	Notes
	<div data-bbox="553 262 1190 596">  </div> <ul style="list-style-type: none"> To-Do List - A pod that allows users to create individualized worklists by adding tasks to a personalized list, in order to keep track of their tasks and check off items as they are completed. <div data-bbox="480 764 682 821">  Example </div> <div data-bbox="553 863 1185 1161">  </div> Work - A pod that allows users to display detailed card views of deliverables and activities, gates, ideas, project work, or workflows associated with their project. Click  when defining the pod to specify the default information that is displayed, apply filters, and set the desired sorting. When the pod is displayed on a project, users can click  to apply their own view, filter, and sort options. <div data-bbox="480 1480 682 1537">  Example </div>

Pod Type	Notes
	<p>are editable based on a user's role and permissions within the project, unless the data is checked as read only. Long string metrics with the Rich Text check box enabled cannot be added.</p> <p> Example</p>  <ul style="list-style-type: none"> • Discussion - Includes a pod that includes the Accolade discussions functionality, providing contributors to discuss ideas directly on the page. <p> Example</p>  <ul style="list-style-type: none"> • Links - Provides a pod which supports adding and removing links. Click  when defining the pod to indicate the Link Name, Process Models and filters used to identify the linkable items to be presented to the user, as well as the button text and a tooltip. When used, the pod shows any items already linked, and allows the user to select new items to be linked, as well as offering the possibility to remove links. Only items matching the filters set by the Process Designer are shown to the user. If desired, you can indicate that filters may be changed at runtime by the user. <p> Example</p>

Pod Type	Notes
	<div><div><div>Edit Links</div><div>Alpha Beta Chi Delta Epsilon Foxtrot Gamma Iota Kappa Lambda</div></div></div> <ul style="list-style-type: none">• Portfolio Project List - Includes a list of all projects that are part of a portfolio or campaign.• Project History - Provides a place to view a project's history including a fixed list of events recorded as users make changes on the project. Users with access to the project have access to the project history. Project history includes, but is not limited to, gate decisions, status reports, stage advancement, and currency updates. Click  when defining the pod to select filter criteria determining what displays on the pod. Only project history meeting the filter criteria displays on the pod. Users on projects can still filter project history when the layout displays on a project page, but they cannot save their filter preferences when filters are set on the pod configuration. <div><div>EXAMPLE</div><div>Example</div></div> <div><div><div>Project History</div><div>Project History (12)</div><div><div><div>Date ▼</div><div>Event</div><div>Description</div><div>By</div></div><div><div>Sep 15, 2021</div><div>Team Member Change</div><div>Function: Product Financial Leader Set to: Jane Customer</div><div> Jackie Manager</div></div><div>Sep 15, 2021</div><div>Team Member Change</div><div>Function: Product Technical Leader Set to: John Doe</div><div> Jackie Manager</div></div></div></div> <ul style="list-style-type: none">• Project Status - Provides a place to show and enter status reports for the project. The pod also provides a link to view the project status history. To allow the entry of new project status reports, select the Use master buttons option on the layout that contains the pod. If the master buttons are not included, the content of the project status pod displays as read only.

Pod Type	Notes
	<p>When the pod displays in a project, the ability to add a project status is based on the user's roles and status permissions on the project team. Metrics are editable based on the metric's presentation settings for Status Report within the process model.</p> <p> Example</p> <div data-bbox="472 499 1268 1050">  </div> <ul style="list-style-type: none"> • Report List - Provides a list of available reports to add to the pod. Click  when defining the pod to select the reports list that displays. See Associating Charts and Reports to Process Models for more information. • Security List - Provides a place to display and edit defined security lists. Click  when defining the pod to select the security list that displays. Only one security list can be selected to display in a pod. Users with certain management rights and allowed access can modify the security list when the layout displays on a project. Additionally, users can only modify levels of a given security list to which they have access. Other levels of the security list display as read only in the pod. • Team - Provides a place to display users assigned to projects including project manager or team leader, project team members, workflow action owners, and gatekeepers. Click  when defining the pod and select Project Team, Workflow Action Owners, or Gatekeepers. Only one group of users can be selected to display per pod. <p>If the Enable User Profile Images is disabled, the Detail View becomes the default view. Click  and  in the top left corner of the rendered pod to</p>

Pod Type	Notes										
	<p data-bbox="451 254 911 285">toggle between simple and detail views.</p> <div data-bbox="479 306 680 363">  Example </div> <div data-bbox="467 394 1268 688">  <p>Project Team</p> <p>Project Team (5)</p> <table border="1"> <tbody> <tr> <td>Jane Doe</td> <td>Project Manager</td> </tr> <tr> <td>Jane Customer</td> <td>Product Technical Leader</td> </tr> <tr> <td>Tony Marketer</td> <td>Product Marketing Leader</td> </tr> <tr> <td>Jackie Franks</td> <td>Product Financial Leader</td> </tr> <tr> <td>Tim Fields</td> <td>Product Manufacturing Leader</td> </tr> </tbody> </table> </div> <ul data-bbox="418 737 1344 1465" style="list-style-type: none"> • Trended Number Metrics - Provides a way to display trended metric data in a pod with a layout. Pod settings provide options to set metrics and trended metric dates that display in a table. For portfolios, number metrics with Track History turned on are trended for projects linked with hierarchy relationships. Differentials between numeric metric values are calculated and displayed in number and graphic format. Table data displays in a Line Chart Trends chart. The table and chart can be included in a PowerPoint template, and is included when downloading and refreshing the presentation. • Trended Metrics Table - Provides a way to see metric changes over time. Metric values display for each selected metric for each project in the portfolio or for the displayed project. This can be helpful for viewing trends in a portfolio to help identify problems and track the health of a project. • Word Cloud - Provides a graphic that surfaces keywords from the name and description of the project and all the projects contained within a parent project. Each word displayed in the graphic is linkable to Quick Search to display project results containing the keyword. Use this pod in idea campaigns to provide visual interest and a way to display trending terms in ideas submitted to the campaign. Words appearing more often are larger and more prominent. The words in the pod display in variants of pods content font color. <div data-bbox="479 1486 680 1543">  Example </div>	Jane Doe	Project Manager	Jane Customer	Product Technical Leader	Tony Marketer	Product Marketing Leader	Jackie Franks	Product Financial Leader	Tim Fields	Product Manufacturing Leader
Jane Doe	Project Manager										
Jane Customer	Product Technical Leader										
Tony Marketer	Product Marketing Leader										
Jackie Franks	Product Financial Leader										
Tim Fields	Product Manufacturing Leader										

Pod Type	Notes
	<p>Viewing a report's contents within a page layout does not require Reporting Rights; however, a user must be an owner or have at least one matching user role for the report to display.</p> <p>Configure additional settings available for report pods including a download option and page size.</p>
Report Groups	<p>Adds a pod that contains the content settings for a comparison view layout. Click  when defining the pod to select the reports and charts available to a comparison view page layout.</p> <p>Note: The report groups pod is created as a part of creating a comparison view page layout, and is not independently available at this time.</p>
Task Board	<p>Adds a pod that displays a project's current stage's task board. This task board categorizes all deliverables and activities into columns with respect to their current statuses, namely “Not Started”, “In Progress” or “Completed”, allowing you to follow the progress of each deliverable and activity more efficiently, and easily move them between statuses. With this task board, team members get a visual representation of their work in a more collaborative view, and are able to identify bottlenecks quicker.</p>
Template Image	<p>Adds a pod that displays an image saved to the Template Library (with a template type of Image).</p> <p>To add a new image select Add New from the Content list. Items added here are also added to the Template Library.</p>

Creating Page Layouts

Administrators and Process Designers with the Template Access user role can design custom layouts to surface project information, such as a project dashboard page that displays when opening a project. Page layouts can contain one or more pods to display information such as project metrics, content accessed from a global link, charts or reports data, quick grids, and more. Layouts can be added as a global link within Accolade or associated with a process model for display within a project.

To create a page layout:

- From the **System** menu, select **Page Design > Layouts**.
To narrow the layout list, search by the layout name, system name, or category.
- Do one of the following:
 - To create a new page layout** - Click **Add New** in the upper right corner of the page.
 - To edit an existing page layout** - Click the name of the layout to open it for editing.
 - To create a layout based on an existing layout** - Click  in the **Copy** column to create a copy that can be used as a base to build a new layout.

💡 The system includes active layouts titled **Project Home** and **Project Gates** that can serve as a project's home and details page, and project gates pages. Copy the layouts to customize them further instead of modifying the original system layouts, ensuring you do not lose the original layouts' pods and format.

3. Enter the following information to identify the layout:

Required fields display with **red** text and an asterisk * if the field is empty.

Field	Description
Name	Enter a name, up to 64 characters long, which identifies the layout.
System Name	Enter a unique, shorter name that identifies the layout in queries, reporting views, field codes, and other places in Accolade. The name must be unique among layouts and can contain only letters (English alphabet), numbers, and the underscore.
Icon	Select the icon and icon color to be used for the layout.
Description	Enter a description of the purpose or nature of the layout. This description helps other users identify the layout throughout the system.
Category	Enter or select the group to which this layout belongs. Use categories to organize like layouts together. For example, you may choose to group all the layouts used for global layouts into the same category, in order to separate them from layouts that are used in process model configuration. <ul style="list-style-type: none"> • Leave this field blank to add to the Default category. • To define a new category, select New Category and enter the category name. • To delete a category, remove every item from the category. Empty categories are deleted automatically. Layouts specific to project pages, configured based on process models on upgrade, display in an Upgrade category and are named based on the correlating process model.
Order	Enter a number to specify the page layout's place when it displays in a list of layouts. Lower numbered layouts display higher in the list. Note: Layouts set as active project pages will display before existing project pages to provide most relevant data first.
Active	Select this check box when the layout is ready to use. Note: If you deactivate a layout that is associated with a process model, the association remains;

Field	Description
	however, the projects based on the model no longer display the layout as a project page.
Create global link	<p>Select if the layout's intended use is as a global link that is accessed from outside a project. When selected, a global link is created when you click Save or Save and Close in the layout editor.</p> <p>💡 If this layout's intended use is as a dashboard or other page displayed in a project with project-specific information, leave this check box clear.</p> <p>After creating the layout, go to System > Page Design > Global Links to configure the global link.</p>
Show project header	<p>Select this check box to include the header portion of a project page when this layout displays within a project.</p> <p>For example, you may choose to not show the project header for layouts used to gather ideas and for idea campaigns.</p> <p>💡 The default hides the header in layout pages.</p>
Hide project menu	<p>Select to remove the project details menu  access from the layout on a project.</p> <p>Hiding the project menu removes the ability to:</p> <ul style="list-style-type: none"> • access the communication options for email and chat. • migrate, copy, close, or delete a project from the layout.
Hide Navigation Breadcrumb	<p>Select this check box to hide the hierarchy breadcrumb and menu from the layout on a project.</p> <p>For new layouts, this option is unchecked by default.</p>
Show process graphic	<p>Select to include the process graphic when this layout displays within a project.</p> <p>The default hides the process graphic in layout pages. Select to show the graphic in projects that use layouts where it is important to show the stage the project is in.</p>
Use master buttons	<p>Select this check box to enable Apply and Reset buttons that save and reset changes to quick grid pods in the layout that are not set as read only.</p> <p>If unselected, Apply and Reset buttons are available to save or reset changes in each individual quick grid pod.</p> <p>💡 If the Read Only Quick Grid advanced setting is enabled on a quick grid pod, no updates can be made to</p>

Field	Description
	💡 that pod regardless if master buttons are used.
Enable page filters	<p>Select this check box to enable runtime filters that can be applied to all charts and reports pods in the layout.</p> <p>Note: In order to apply runtime filters, the selected reports must be set up with filters that have runtime filtering enabled, and the selected charts must be created from an online report with filters that have runtime filtering enabled.</p> <p>If unselected, filters may be available to be applied individually to charts and reports pods, but not to the layout as a whole. See the Viewing Charts and Reports topic in the Accolade online Help for more information on runtime filtering options.</p>
Enable cycles	<p>Select this check box to enable Charts on the layout. Chart Cycles can be enabled on any layout.</p> <p>Cycles allow you to look at the various charts based on a common metric, such as Region, Business Unit, Product Line, etc. Each chart configured for Cycles will re-render based on the selected Cycle value.</p>
Add to new Process Models	<p>Select to automatically associate the layout with Gated, Non-Gated, and/or Idea process models when new process models are created.</p> <p>The layout defaults as checked in the Pages & Layouts section on the Pages tab of a new process model and is useful when wanting to include the layout as a default project page.</p>
Page width	<p>Select how the page layout width is determined.</p> <ul style="list-style-type: none"> • Select Autofit to display the page to fit the pods and pod contents left aligned. • Select Fixed and enter the width of the layout in pixels to have the page display with a forced width.
Fill page	<p>Select to expand the height of the lowest pods in the layout.</p> <p>The pods extend to fill the remaining space on the layout if the layout does not already scroll on a page. If the layout scrolls, the lowest pods do not expand.</p>
Alignment	<p>If you set the page width as Fixed, select the layout alignment as Left, Center, or Right.</p>
Margin color	<p>If you set the page width as Fixed, click the color block next to the field and select a color to apply to the margin width of the layout.</p>
Background color	<p>Click the color block next to the field and select a color to apply to the background of the layout.</p>

Field	Description
Configuration Access Groups	Select the access groups to which the layout belongs. Process Designers with matching permissions will be able to edit and view the layout or the data within its pods. The access groups displayed are based on the current user's access group permissions and the access groups the layout belongs to.
Process Model Usage	<i>(Only available when editing an existing layout)</i> Click the Process Model Usage button to see the list of process models that the layout is associated with. The list includes all process models the layout is included in, as well as links to the process model's component tree pages that you have Edit access to.

4. Click **Save** in the lower right corner of the page to save changes, **Save and Close** to save the configuration and close the editor, or **Cancel** to close the editor without saving changes.
5. Continue with any one or more of the following steps to complete and implement the layout:
 - Add one or more pods or comparison sets to the layout. Without at least one pod, the layout is blank.
 - Associate the layout with one or more existing gated, non-gated, or idea models to include it in projects based on that model.
 - Add the layout as a global link to display the page outside of a project.

Notes:

- To delete a layout, click  in the **Delete** column on the Layout page. If you delete a layout that is used as a global link, the global link is also automatically deleted.

Important! Do not delete system layouts used for personalized home pages. You will not be able to undo this action and will have to contact a System Administrator to run a script to re-add the layouts.

- Copying layouts containing the Advanced Platform pod will not copy the JavaScript or HTML files. Save the copied layout then add or upload the JavaScript and/or HTML files.
- The filter icon will not appear in a layout's charts or reports pods if there are no filters available for users to apply to the contents.

Exercises - Create a Campaign Using Page Layouts

Try out what you have learned!

- Design a campaign using a page layout. Ensure the layout contains a **Create Project** pod.
 - Include an image pod, several different metric pods, and voting pods.
 - Associate the page layout to a project.
-

Exercises - Vote on Ideas in Projects

Try out what you have learned!

- Navigate to the project containing the idea campaign page layout.
 - Select the custom project page containing the voting pod.
 - Use the star scale to select your rating.
