Location

- Enter the element's details or metric values.
- Change the project thumbnail image.
- Add or remove team members.
- Configure phase information.
- Display project relationships or dependencies.
- Set planning
 element security.
 - Delete the element.

Hover over the element and click the following for additional options:

- **Display** the project description and selected metric values.
- Pin the element details to the view.
- Display or modify the current project relationship links.
- 🔁 Display the Time View for the project.
- Display the hierarchy of related projects.
- **Display the related** child projects.

Moving Up the Hierarchy

- 1. Click **1** at the top of the **Planning Board**. The last item in the tree is the currently displayed board.
- 2. Select a level in the tree to navigate to that board.

Working with Planning Views

Options Available in Both Grid and Gantt Views

- Set display settings for the view.
 - **Refine** which elements are included in the view. Available on select fields.
- **Create annotations** and notes in views.
- **Save Save a view** with the current settings.

Managing Gantt Views

Changing Element Metric Values or Dates in the Gantt

- If the vertical axis is a list metric, drag and drop an element to another swim lane to update metric value.
- Hover over the left or right end of an element until cursor changes to ↔. Click and drag to a new date.
- Drag and drop an element to a new location.
- Hover over the element and click = to change the metrics or dates in the element details.

Changing the Scale of the Gantt View

Use the slide bar to select the zoom level to display the time intervals closer or farther apart. Click **••** to adjust displayed view to fit maximum horizontal screen width.

Managing Grid Views

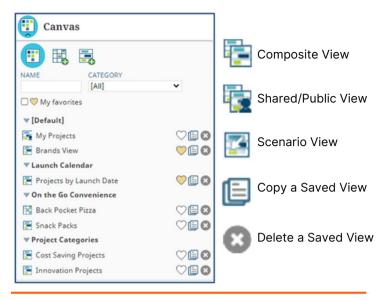

Changing Element Metric Values or Dates in the Grid

- If an axis is a metric or a date, drag and drop an element to a cell in the grid to update its value.
- If an axis is a metric or a date, drag and drop the element to a cell in the grid to update its values in the element details.
- Hover over the element and click to change the metrics or dates in the element details.

Configuring Time Frames for Date Grids

- 1. Click 💞 to open Edit Planning Grid Settings dialog.
- 2. Click 💣 next to the axis field you wish to change.
- 3. Select the period and quantity of period to display.
- 4. Enter the starting date and click **OK**.

Displaying Gantt View in Presentation Mode

Click store to display the view without the navigation and Accolade menu and title bars.

Applying Element Legends to Planning Views

- 1. Click 💣 to access the view's display settings.
- 2. In the **Border** and/or **Fill** fields, select a metric define with colors to apply a legend to the view.
- (Optional) In the Show Legends section, select the Border and/or Fill check boxes to include interactive legend(s) within the view.

Elements are shaded or border colors added based on their setting for the metric.

Creating and Displaying Relationships

Creating Links Between Elements at Any Level

- 1. Display the **Planning Board**.
- 2.Enter text in the Quick Search in the title bar.
- Click Anext to the project and drag the line to another project in the search results, or to an element displayed in the **Planning Board**.
